ACE Controls Introduces Weartec Plus Standard Corrosion Protection for Industrial Shock Absorbers and Feed Controllers

FARMINGTON HILLS, MI – ACE Controls announces the introduction of Weartec Plus standard corrosion protection on the majority of its industrial shock absorber and feed controller threaded outer tubes, at no additional cost.

Aggressive independent laboratory salt-spray testing confirms that Weartec Plus offers superior corrosion protection compared to platinum, Armoloy, nickel plate, hard chrome, black oxide.

- 30% better than platinum
- 30% better than Armoloy & nickel plate
- 67% better than hard chrome
- 150% better than black oxide

It's the ideal corrosion fighter in wash down areas for the food and packaging industries as well as outdoor environments.

ACE Controls Inc. is an ISO 9001:2000 certified manufacturer with a global customer service network that includes offices in England, Germany and Japan with distributors in over 110 cities in 35 countries. The product lines of ACE Controls include: industrial and safety shock absorbers, gas springs, hydraulic dampers, rotary dampers, feed controllers, TUBUS elastomer bumpers and NuCushions for pneumatic cylinders.
